

# Take a 12% Greater Margin

## Stabilize N with TAPPS

More Crop Available Nutrients

2KC

2KP

ISO-Bus with Auto Boom

Compatible with ISO-Bus virtual terminals

**.....Nominal 10% to 20% Yield increases with Exactrix Technology  
Right to the Bottom Line....\$30 to \$50 per acre in a wheat rotation.**

**Applies 166% More Available Nutrients With TAPPS, Timing, Geometry.**

Uniform 1% CV port to port delivery with liquid NH3. No sinusoidal flow...with nitrogen stabilization.

Advanced seed row geometry allows turning and nutrient uptake at emergence. Ideal shank application with Atom Jet and paired row Flexicoil Stealth openers. Also approved with Dutch and Bourgault shank and single disc openers.

Breaks yield barriers in cereal grains and canola... less N at lower cost/bu.  
TAPPS formulation drives P and S efficiency.  
Better proteins, better oil content, better margins with process management.

Weighs liquid NH3 as it is applied...No guessing from field to field.  
High speed application with No-Tillage using single disc tool bars and seeders.

TAPPS Formulation 1890-1895

Flexicoil Stealth & Dutch

Bourgault MRB - 25

Crystalline TAPPS, NPS & Zn

Outstanding conclusion from the fertilizer industry...IT WORKS!

**Salvage & Convenience, solution 32.**

**Non uniform applicators... are fast.  
Urea, MAP, AS, KCL.**

**Looking for answers in winter wheat production?**

Exactrix TAPPS Formulators provide uniform and timely application. High speed single disc tool bars take more time than a floater rig but assures another \$150 per acre of net income.

**Side dressing winter wheat...  
Dry land or irrigated production... it works!**

**"Tons moved..." in the wrong place.**
