

Take a 12% Greater Margin

Stabilize N with TAPPS

More Crop Available Nutrients

2KC

2KP

ISO-Bus with Auto Boom

Compatible with ISO-Bus virtual terminals

.....Nominal 10% to 20% Yield increases with Exactrix Technology

Right to the Bottom Line.....\$30 to \$50 per acre in a wheat rotation.

Applies 166% More Crop Available Nutrients With TAPPS, Timing, Geometry.

Uniform 1% CV port to port delivery with liquid NH₃. No sinusoidal flow...with nitrogen stabilization.

Advanced seed row geometry allows turning and nutrient uptake at emergence. Ideal shank application with Atom Jet and paired row Flexicoil Stealth openers. Also approved with Dutch and Bourgault shank and single disc openers.

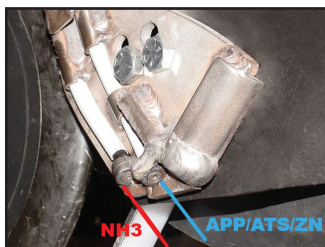

Breaks yield barriers in cereal grains and canola... less N at lower cost/bu.

TAPPS formulation drives N, P and S efficiency.

Better proteins, better oil content, better margins with process management.

Weighs liquid NH₃ as it is applied...No guessing from field to field.

High speed application with No-Tillage using single disc tool bars and seeders.

TAPPS Formulation 1890-1895

Flexicoil Stealth & Dutch

Bourgault MRB - 25

Crystalline TAPPS, NPS & Zn

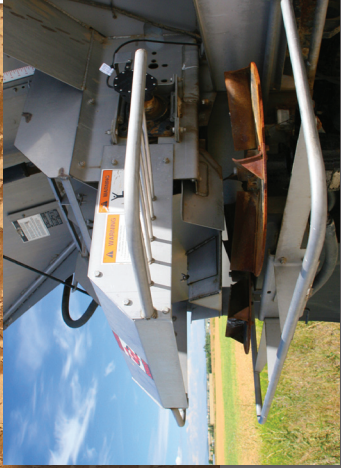

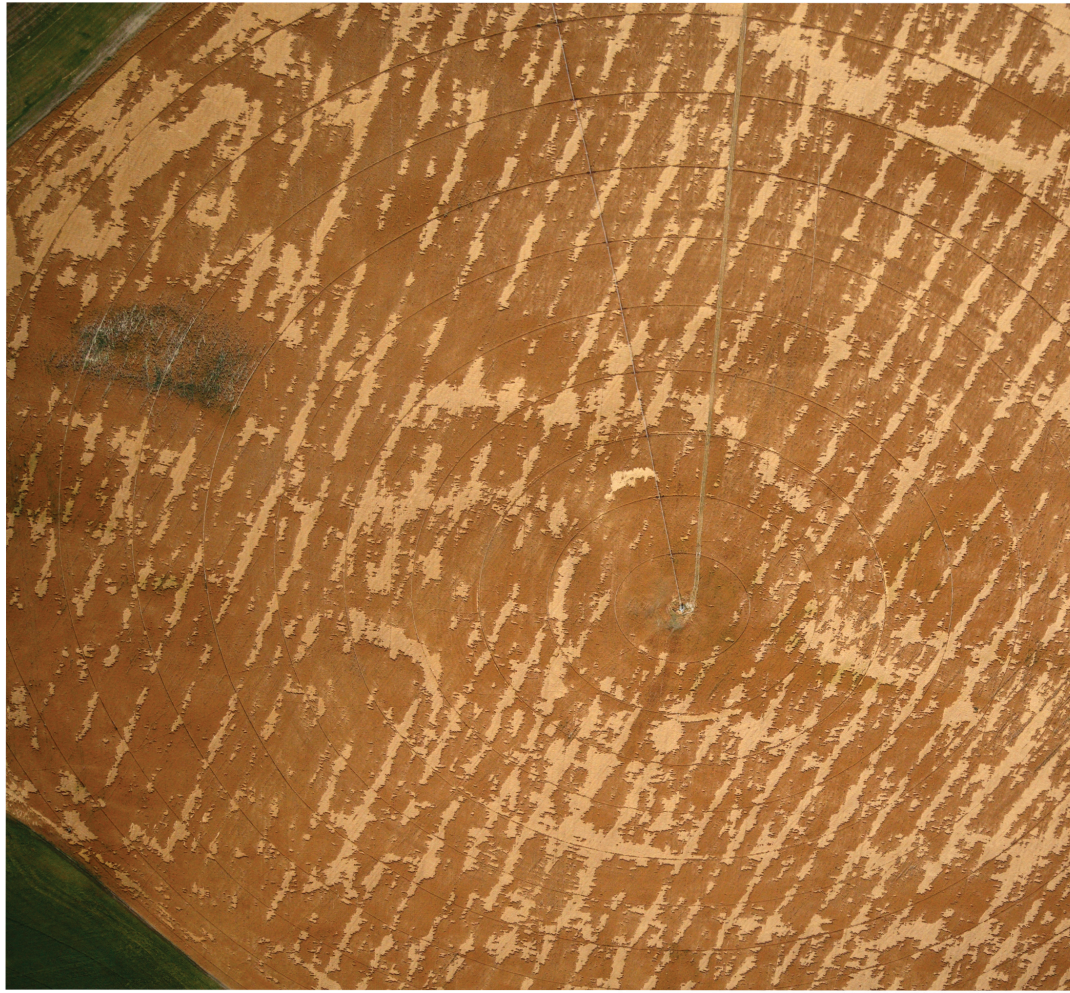

Outstanding conclusion from the fertilizer industry...IT WORKS!
